Education

Galgotias University

B.Tech in Computer Science; CGPA: 7.5

Greater Noida, UP

2020 – 2024

M.M. Memorial High School (Bihar Board)

Intermediate (12th Class); Percentage: 68.6%

Gopalganj, Bihar

2019

ARPA International School (CBSE)

Matriculation (10th); CGPA: 9.2

East Champaran, Bihar

2018

Skills

Web Development: Express.js, Node.js, React.js, Redux Toolkit, React Router

Programming Languages: JavaScript, C++ (STL, OOP), MySQL

Tools Utilities: VS Code, Postman, Recharts, Google Sheets, Apps Script

Experience

Data Analytics Intern

Randstad Digital Pvt. Ltd (Bengaluru, India)

Jul 2024 – Sep 2024

Tools Used: MySQL, Google Sheets, Apps Script

- Processed and structured 20,000+ recruitment records across 30+ unorganized Google Sheets to enable centralized HR analytics.
- Built automated dashboards using Google Apps Script, cutting manual reporting time for the HR team by **50%**.
- Extracted insights using advanced MySQL queries (e.g., hiring trends, rejection patterns, and application statuses).
- Created a dynamic, real-time reporting system, making data accessible and meaningful to non-technical stakeholders.

Projects

EasyLink – URL Shortener Platform

[GitHub Link](#)

Node.js, Express.js, MySQL, React.js, Redux Toolkit, TanStack Query, Recharts, React Router, Bootstrap

- Developed RESTful APIs in Node.js and Express.js using MVC architecture, secured with JWT (HTTP-only cookies) and bcrypt for password hashing.
- Built a responsive Single Page Application using React.js and Bootstrap with smooth navigation via React Router.
- Implemented global state management with Redux Toolkit and used TanStack Query for optimized API fetching, caching, and error handling.
- Integrated Recharts to visualize analytics (total clicks, per-day stats, device breakdown, URL trends) with date-range filtering.
- Designed a normalized MySQL database with efficient query logic for performance and data insights.

EzyBazaar – Ecommerce Platform

[GitHub](#) — [Live](#)

React.js, React Router, Redux Toolkit, JavaScript, Bootstrap

- Developed a scalable e-commerce platform that fetches real-time product data via APIs.
- Implemented cart management with quantity control and live pricing using Redux Toolkit for state handling.
- Enabled seamless navigation with React Router and preserved cart state using localStorage.
- Enhanced performance via lazy loading, API caching, and efficient rendering of product listings.
- Built a responsive, user-friendly UI with dynamic updates for a smooth shopping experience.

Achievements & Certifications

Achievements

- Solved 160+ problems on LeetCode
- Champion Level – CodeStudio
- 100+ questions solved – CodeTantra
- 4 badges – SQL & JavaScript (HackerRank)

Certifications

- DBMS – Infosys Springboard
- Database Design – Oracle
- SQL Intermediate – HackerRank
- Blockchain Paper – IJRMT
